above Email Id**

Accommodation

Information: There are good hotels around Apollo Gleneagles Hospital, Kolkata. Salt Lake, Rajarhat and hotels on By-pass Road which can be found on Internet. Please contact Organizing Secretary for further details.

Why learn to use Bayley-III?

- Bayley-III is an internationally recognized assessment and one of the most widely used developmental scales globally and in India
- It indicates strengths, weakness and competencies in early development so that caregivers and professionals can properly plan for the child's future
- Useful in program evaluation, ongoing monitoring of progress and outcome measurement
- Research using Bayley-III has a greater likelihood of being accepted for publication in international journals, compared to that with other scales not recognized internationally

Benefits of the workshop:

- Valuable knowledge on the application of Bayley-III in different settings and its relevance for current professional practice
- Crucial knowledge of the changes in the latest edition of Bayley-III such as item or subtest addition, modification or deletion
- Hands on exposure to administration and interpretation of Bayley-III

Bayley-III Overview

Format

Core battery of five subtests-cognitive, language, motor, social-emotional, and adaptive behavior

Ages

1 to 42 months

Scores

Scaled score for each subtest, standard scores, age equivalents, and percentile growth scores

Administration

30 to 90 minutes (depending upon age of child)

See the big picture.

Even when a child can't speak, he can tell us something. How he feels. How he thinks. How he interacts with the world around him. And we need to know how to read these signs. With Bayley-III, you can. You have a comprehensive tool for identifying, measuring and assessing a child's development.

The Bayley Scales of Infant and Toddler Development is used to identify deficits in young children across five major developmental domains:

Language

Receptive and expressive language subtests

Adaptive Behavior

Communication, Self-care, self-direction

Motor

Fine motor and gross motor subtests

Cognitive

Visual preference, attention, memory, sensorimotor, exploration, manipulation and concept formation

Social-emotional

Communicating needs, self-regulation using emotional signals

Who can attend?

Paediatricians and Paediatric trainees

- Neonatologists
- Psychiatrists and Psychiatric trainees
- Psychologists
- Physiotherapists
- Researchers
- Any health professional involved in the detailed developmental assessment of infants and young children
- Speech and language therapists
- Social workers
- Early interventionists

“The Bayley-III workshop was very insightful and helped me deepen my understanding of all aspects of a child’s development. I would recommend this workshop to any professional committed to the wellbeing of young children.”

Participant, Bayley-III workshop

Pearson Academy India is the training division of Pearson Clinical & Talent Assessment and conducts this workshop on-site for institutions, besides in its training center at Bangalore.
